AZU210	875.0	345.0	105.0
AZU240	935.0	345.0	105.0
AZU270	995.0	345.0	105.0
AZU300	1060.0	345.0	105.0

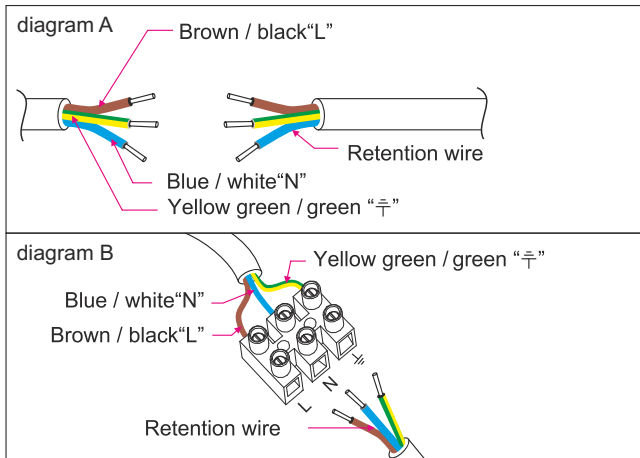

Installation Instruction:

Warning: Luminaire can not be directly installed on the surface or in the areas of flammable material in any circumstances
Warning: If outer flexible cable or cord of luminaire are damaged, only manufacturer, its agent or eligible contractor can replace to avoid accident.

Step 1: Press down the snap outwards to open, and unscrew, using 4mm allen key.

Step 2: Connect the power supply wires with the retention wire in lamp post. Diagram A for standard wiring and Diagram B include optional Photocell connection. Installer is responsible to provide durable insulated and waterproof connector. Once connected, slide on and mount lamp into the lamp post arm.

Step 3: Balance the lamp position, tight allen key bolts (M10). Adjust tilt angle by elevation fixing, tight securely, lock cable fix head.

Step 4: Close cover and press down to lock. Simply lock down clip until tightened. Use opposite side 4mm allen key to lock bolts on the cover.

Caution:
 Ensure safety and firmness of wiring junction.
 Protect power supply cables against and damage during installation.
 DO NOT clean lens with strong acid and any marked corrosive liquids.

Light Controller / Photocell Installation Instruction

1. Remove waterproof cover from top of the lamp.

2. Lock the base of photocell controller with the M4 * 25 + screws into the socket

3. Place photocell into fixed socket, and lock by turning towards arrow indication.

4. Close cover and press down to lock.

Wrench snap inside until tightened.

Use opposite side 4mm allen key to lock bolts on the cover.

5. Wiring diagram (see page 1 for additional info)
